## BOX TEC

Bereits im Jahr 2008 wurde das Schubladeninterieur BOX TEC entwickelt. Die Idee war simpel: Mit Strangpressprofilen und Aluminiumblechen entstand ein absolut minimalistisches Schubladensystem, womit eggersmann in Bezug auf die Innenausstattung anderen Küchenherstellern weit voraus eilte.

Die Aluminiumvariante, die eggersmann in die UNIQUE Serie aufnahm, deutete bereits damals auf eine klassische, zeitlos-moderne Ausstattung hin, die langfristig stetig erweitert werden kann. Dem Material Aluminium folgte Esche und Mooreiche; ästhetisch-perfekt und für alle Küchen von eggersmann geeignet. Die Aluminiumausstattung zeigt technische Anmutung. Modern und absolut im Trend ist die Variante in Esche, luxuriös die Ausstattung in Mooreiche. Den verschiedenen Materialien stehen drei unterschiedliche Bodenmatten zur Auswahl: Linoleum-, Alcantara- oder Antirutschmatten.

Die neuesten Ergänzungen sind unter anderem mit Linoleum bezogene Besteckschalen, Gastronormbehälter, neue Gewürzgläser und Ausgleichselemente. BOX TEC kann längs und quer in die Schubladen eingelegt werden. Selbstverständlich beinhaltet das System auch vergleichbare Elemente für die Auszüge.

Viele international anerkannte Designauszeichnungen ‚krönen‘ das System und untermauern dessen Design und Ästhetik.

## BOX TEC

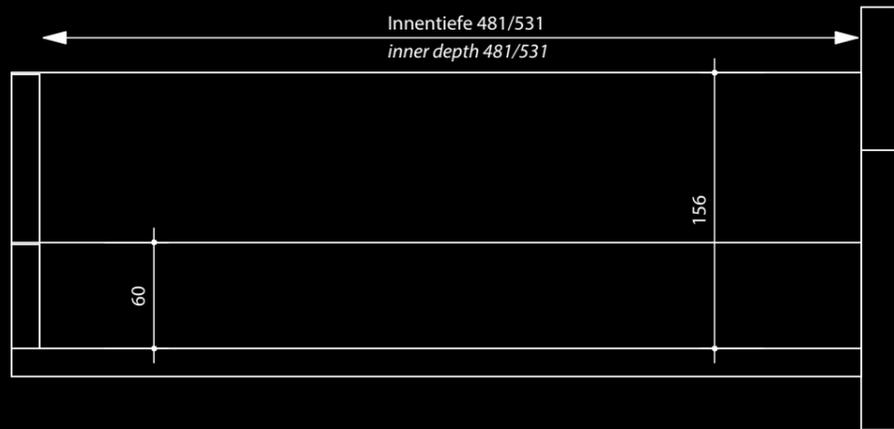

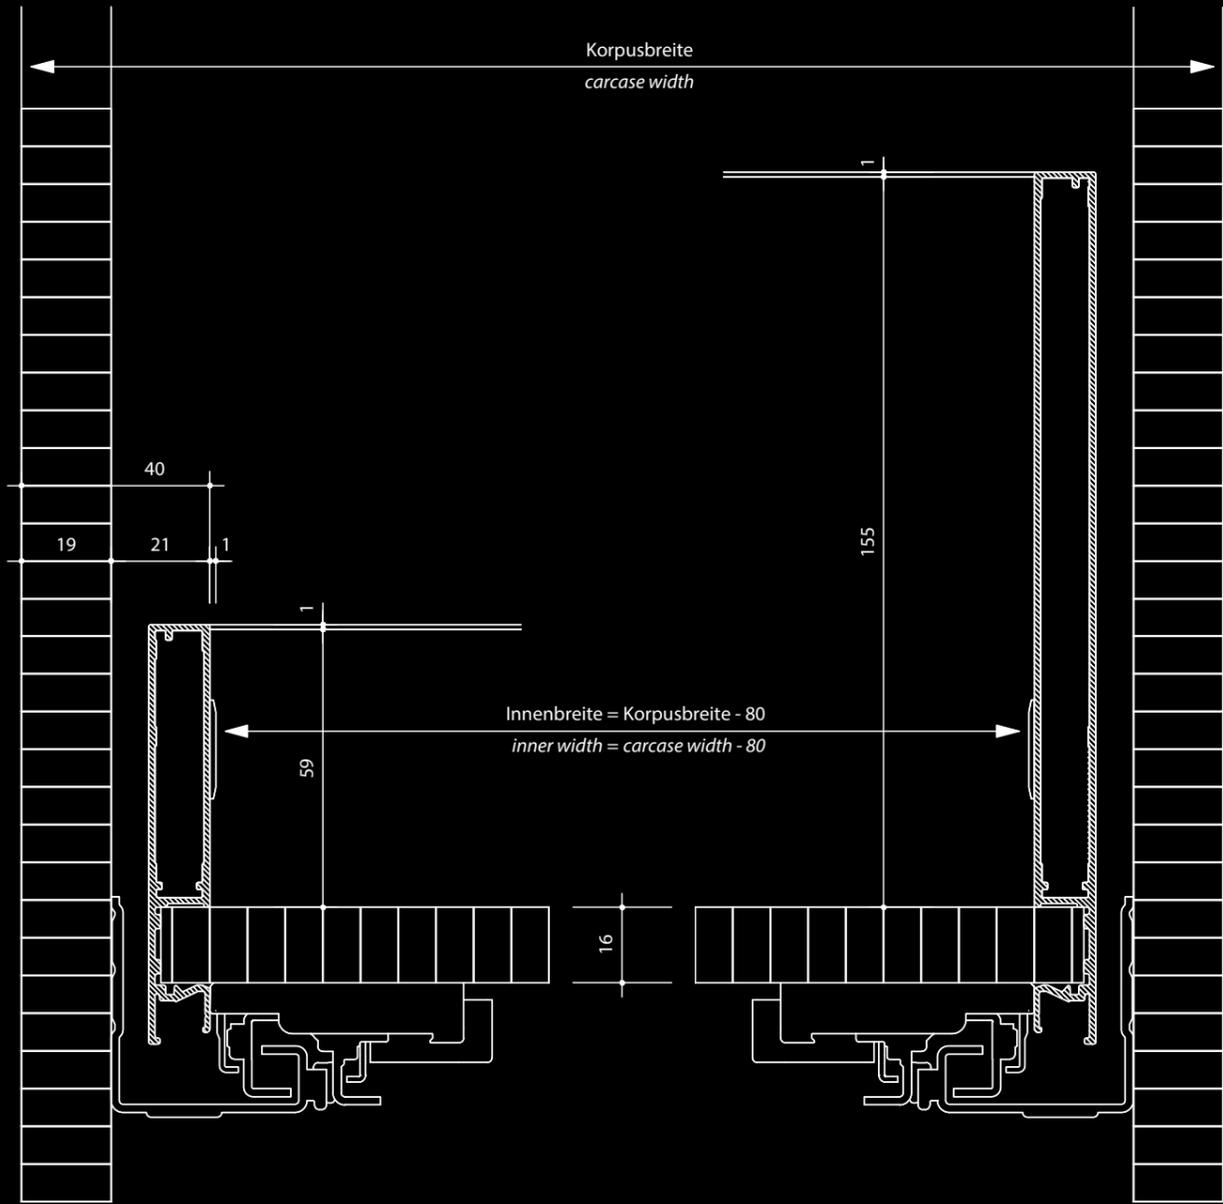

*The interior drawer system BOX TEC was developed as early as 2008. The idea was simple: extruded aluminium frames and sheaths formed the basis for an absolutely minimalist drawer system, which put eggersmann way ahead of other kitchen manufacturers with regard to interior fittings.*

*The aluminium version which eggersmann used in the UNIQUE series already pioneered the classical modern features which can be constantly expanded over time. The aluminium version was followed by ash and smoked oak; aesthetic perfection suitable for all eggersmann kitchens. The aluminium fittings make for an elegant technological appearance. Modern and perfectly trendy is the version in ash while smoked oak adds a luxurious touch. The various materials can be teamed with three different types of floor matting: linoleum, Alcantara and anti-slip.*

*Some of the latest additions are the cutlery trays with linoleum finish, Gastronorm containers, new spice jars and filler elements. BOX TEC can be installed in drawers lengthwise or crosswise. Of course the system also provides similar elements for the pull-outs.*

*Many internationally recognised designs awards ‘crown’ the system and promote its design and aesthetic appeal.*
